Re: North Lily Mining
Tintic Project
Geomembrane

Dear Mr. Pinkerton:

We have reviewed your request to use a 30-mil polyvinyl chloride (PVC) geomembrane for the Tintic project expansion.

Based on our review of the information, we concur with the request. The use of a 30-mil PVC geomembrane is approved provided that the ore height will not exceed fifty (50) feet, the exposed geomembrane is suitably and adequately protected and the existing and the proposed geomembranes are properly seamed in the field.

If we can be of further assistance, please let us know.

Sincerely,

Utah Water Pollution Control Committee

Don A. Ostler, P.E.
Executive Secretary
